Billy Le

An accomplished software engineer with a unique combination of military service and self-taught expertise. Skilled in identifying and solving complex software development challenges with reliable technologies. Proven ability to improve internal development workflow and effectively communicate business requirements. Seeking to leverage my skills and experience in a dynamic organization to drive positive results.

EXPERIENCE

4insite, Remote — *Lead Front-end Engineer*

AUG 2019 - DEC 2022

Managed extensive solutions for FE applications to include development tooling, web performance and bundle optimizations. Composed and maintained responsive UI and UX elements to adhere to a strict design system. Lead a small team between 5-10 software engineers on best practices, communicating system changes, and providing constructive feedback through one-on-one mentoring, pair programming and code reviews.

SBM Management, Sacramento, CA — *Front-end Engineer*

NOV 2018 - AUG 2019

Transformed a full Angular app into React within 2 months using best-practices and templating reusable pages, services, and components.

CLC Inc., Roseville, CA — *Software Engineer*

SEPT 2017 - OCT 2018

Integrated Typeform for a survey feature that impacted a wide customer base to collect data to better serve our customers. Followed Agile methodology through short development cycles.

Freelance, Sacramento, CA — *Full-stack Engineer*

APR 2017 - SEPT 2017

Developed and learned Rails on-the-job for a Netflix-style application for a customer using React on Rails.

EDUCATION

freeCodeCamp.org, Online — *Self-Study*
