Billy Le

github.com/billy-le

A skilled software engineer with 4+ years experience and independent thinker looking to tackle modern software development problems using the latest technologies. Seeking to improve development workflow and understanding business requirements by actively engaging in pinpointing the pain problems.

EXPERIENCE

4insite, Remote — Lead *Front-end Engineer*

AUG 2019 - PRESENT

Managed extensive solutions for FE applications to include development tooling, web performance and bundle optimizations. Composed and maintained responsive UI and UX elements to adhere to a strict design system. Lead a small team between 5-10 software engineers on best practices, communicating system changes, and providing constructive feedback through one-on-one mentoring, pair programming and code reviews.

SBM Management, Sacramento, CA — *Front-end Engineer*

NOV 2018 - AUG 2019

Converted an Angular application into React using best-practices and standards.

CLC Inc., Roseville, CA — *Software Engineer*

SEPT 2017 - OCT 2018

Engineered and contributed to various features and internal tools for user surveys and specific edge cases specified by project manager.

Freelance, Sacramento, CA — *Full-stack Engineer*

APR 2017 - PRESENT

Developed software for clients through a subcontracting company.
