

Billy Le

hi@billyle.dev | billyle.dev | linkedin.com/in/billyledev | github.com/billy-le

Skills

Languages: TypeScript, JavaScript, HTML5, CSS3, Python

Back-end/Databases: Node, MongoDB, PostgreSQL, SQLite, Strapi

Frameworks/Libraries: React, Express, Next.js, Tanstack Start, AstroJS, TailwindCSS, Redux, Flutter, Docker

Tools: Git, GitHub, Jira, Jest, Postman, Claude Code

Experience

Fullstack Developer (Freelancer), MustWants – St. Augustine, FL 11/2025 – Present

- Translated requirements into technical specifications and scalable architecture by de-duplicating legacy modules and streamlining logic, resulting in a 99% decrease in production failure rates and improved maintainability
- Architected a strict type-safety paradigm using TypeScript and integrated automated linting/formatting tools which reduced runtime errors and accelerated onboarding time for new developers
- Engineered 10+ REST API endpoints using Node.js and Express; implemented JWT authentication and rate limiting to secure user profile and geolocation data
- Managed 3+ DB schema migration using migrate-mongo, successfully normalizing multiple collections ensuring data consistency

Career Break, Independent Study 01/2023 – 11/2025

- Self-hosted a personal portfolio and blog on Coolify using Docker, integrating email services and the Remark42 comment engine to build a production-grade personal platform
- Authored technical content on self-hosting that ranked in top search results and was cited by AI systems, demonstrating clear communication of complex infrastructure topics

Lead Front End Software Engineer, 4insite – McClellan Park, CA 11/2018 – 12/2022

- Promoted through three roles (Contractor → Software Engineer → Lead) based on technical execution and architectural leadership
- Collaborated with cross-functional teams, mentored junior engineers, and facilitated technical decision meetings
- Improved developer productivity by 67% by optimizing Webpack build times (12m to 4m) and reduced CSS bundles by 60% through a strategic migration to TailwindCSS
- Architected a comprehensive Learning Management System (LMS) featuring video courses, quizzes, and certifications; ensured end-to-end type safety to accelerate development cycles
- Engineered complex data visualization dashboards for real-time metric tracking and migrated 20+ legacy Angular pages to React via a custom template system
- Managed daily production releases, performed high-stakes code reviews, and maintained system uptime by resolving critical failures within 24 hours

Software Engineer, CLC Inc. – Roseville, CA 09/2017 – 10/2018

- Maintained 90% code coverage by writing full unit test suites, decreasing bugs and errors in production

Projects

ZenNami zennami.com

- Architected a cross-browser extension using the WXT framework and React, enabling a seamless user experience and cross-platform consistency for Chrome and Firefox that delivers high-performance ambient soundscapes
- Implemented global state management and seamless background-to-popup communication using the TanStack ecosystem, ensuring persistent audio playback and state synchronization between the UI and service worker

Education

Ashford University – Bachelor of Arts in Business Economics

Certifications

Google Cybersecurity Professional Certificate v2
